

## ENERGY MANAGEMENT as a SERVICE

# UTILITY PRO USA

a MasterTel USA Company

Utility Pro USA offers various energy management systems which monitors and assesses your facility's energy performance and reports to you in real-time. It gives you solid facts and meaningful insights for smart decisions to manage your energy use and control your costs.

With Utility Pro USA's solutions, you can gain control over your energy use and achieve significant savings. Savings can go direct to your bottom line or re-purposed to fund additional energy efficiency capital projects!

- Gain 5-15% savings with low or no cost operational changes
- Achieve additional savings of 30% or more with targeted capital investments and improved budget management
- Sustain your hard earned savings over time with continuous monitoring

### **BENEFITS of an Energy Management System:**

- **Make smart energy decisions in real time.**
- **Isolate and eliminate waste.**
- **Reduce your energy spend by 15% in your 1st year.**
- **Achieve accurate and impartial verification of savings achieved.**
- **Manage your budgets more efficiently.**
- **Makes it easy to design and implement an energy program.**
- **Assists you in reducing your carbon footprint.**
- **Flexible and easy to use, web based Dashboard.**
